9/9

The Netherlands has always played an important role in the development of printed letters. The setting and printing of loose lead letters was also invented in the Netherlands at the same time. It is possible that Laurens Janszoon Coster (1405–1468) was the inventor, or perhaps another printer who remains unknown. In the 16th century, Antwerp was a major center of the typographic world. The most talented type cutter of the Golden Age was Hendrik van den Keere (1540–1580), who lived in Ghent in modern Belgium. His designs are among the best of that era and continue to inspire a large number of type designers today. The Netherlands has always played an important role in the development of printed letters. Im Europa des 19. Jahrhunderts suchte das Denken zwischen Vernunft und Glauben nach neuer Gewissheit, als Søren Kierkegaard (1813–1855) den Blick radikal auf den Einzelnen richtete. Für ihn war Freiheit kein Besitz, sondern ein Sprung in das Ungewisse – getragen von Angst, Entscheidung und Glauben. Gegen die selbstzufriedene Vernunft seiner Zeit stellte er das persönliche Erleben als eigentliche Wahrheit, den Glauben als Wagnis des Ichs. So wurde aus der Philosophie wieder eine Frage des Lebens selbst.

Durant le siècle XIX en Europe, la pensée oscillait entre raison et foi lorsque Søren Kierkegaard (1813–1855) porta son attention de manière radicale sur l'individu. Pour lui, la liberté n'était pas une possession, mais un saut dans l'inconnu – soutenu par l'angoisse, le choix et la foi. Face à la raison complaisante de son époque, il érigea l'expérience personnelle en véritable connaissance et la

12/14

In het negentiende-eeuwse Europa balanceerde het denken tussen rede en geloof, toen Søren Kierkegaard (1813–1855) de aandacht radicaal op het individu richtte. Voor hem was vrijheid geen bezit, maar een sprong in het onbekende – gedragen door angst, keuze en geloof. Tegenover het zelfgenoegzame verstand van zijn tijd stelde hij de persoonlijke ervaring als de ware vorm van kennis en het geloof als de moedige daad van het zelf. Zo werd de filosofie opnieuw een vraag naar het leven zelf.

In Europa suchte das Denken zwischen Vernunft und Glauben nach neuer Gewissheit, als Søren Kierkegaard (1813–1855) den Blick radikal auf den Einzelnen richtete. Für ihn war Freiheit kein Besitz, sondern ein Sprung ins Ungewisse – getragen von Angst, Entscheidung und Glauben. Gegen die selbstzufriedene Vernunft seiner Zeit stellte er das persönliche Erleben als die eigentliche Wahrheit, den Glauben als Wagnis des Ichs. So wurde aus der Philosophie wieder eine Frage des Lebens selbst. Europa des 19. The Netherlands has always played an important role in the development of printed letters. The setting and printing of loose lead letters was also invented in the Netherlands at the same time. It is possible that Laurens Janszoon Coster (1405–1468) was the inventor, or perhaps another printer who remains unknown. In the 16th century, Antwerp was a major center of the typographic world. The most talented type cutter of the Golden Age was Hendrik van den Keere (1540–1580), who lived in Ghent in modern Belgium. His designs are among the best of that era and continue to inspire a large number of type designers today. The Netherlands has always played an important role in the development of printed letters. *Europe, thought wavered between reason and faith when
Søren Kierkegaard (1813–1855) turned attention radically
toward the individual. For him, freedom was not a posses-
sion but a leap into the unknown—sustained by anxiety,
decision, and faith. Against the complacent reason of his
age, he set personal experience as the only true knowledge*

16/18

Europa des 19. Jahrhunderts suchte das Denken zwischen Vernunft und Glauben nach neuer Gewissheit, als Søren Kierkegaard (1813–1855) den Blick radikal auf den Einzelnen richtete. Für ihn war Freiheit kein Besitz, sondern ein Sprung in das Ungewisse – getragen von Angst, Entscheidung und Glauben. Gegen die selbstzufriedene Vernunft seiner Zeit stellte er das persönliche Erleben als eigentliche Wahrheit, den Glauben als Wagnis des Ichs. So wurde aus der Philosophie wieder eine Frage des Lebens selbst. Im

Europe, la pensée oscillait entre raison et foi lorsque Søren Kierkegaard (1813–1855) porta son attention de manière radicale sur l'individu. Pour lui, la liberté n'était pas une possession, mais un saut dans l'inconnu – soutenu par l'angoisse, le choix et la foi. Face à la raison complaisante de son époque, il érigea l'expérience personnelle en véritable connaissance et la foi en acte audacieux du moi. Ainsi, la philosophie redevenait une question de vie elle-même. Durant le siècle XIX en Europe, la pensée oscillait entre raison et foi lorsque Søren Kierkegaard (1813–1855) porta son attention de manière radicale sur l'individu. The Netherlands has always played an important role in the development of printed letters. The setting and printing of loose lead letters was also invented in the Netherlands at the same time. It is possible that Laurens Janszoon Coster (1405–1468) was the inventor, or perhaps another printer who remains unknown. In the 16th century, Antwerp was a major center of the typographic world. The most talented type cutter of the Golden Age was Hendrik van den Keere (1540–1580), who lived in Ghent in modern Belgium. His designs are among the best of that era and continue to inspire a large number of type designers today. The Netherlands has always played an important role in the development of printed letters. Balance of classical proportion and modern restraint

Jörg Drees

Kierkegaard is a modern serif typeface in renaissance style that merges historical grace with contemporary precision. Drawing inspiration from the philosophical spirit of Søren Aabye Kierkegaard (1813–1855), this type family celebrates the creative potential born from constraint – echoing Kierkegaard’s insight that “The more one limits oneself, the more resourceful one becomes.”

At its core, Kierkegaard embodies this principle through restraint and refinement. The design balances the organic flow of broad-nib calligraphy with the structural clarity of modern typography. Each letterform is carefully modeled with subtly curved stems, allowing the font to convey warmth and humanity within a rational, typographic framework. The result is a typeface that feels both timeless and alive – rooted in the heritage of Renaissance serifs yet adaptable for contemporary design needs. From editorial layouts to branding, long-form text, and digital interfaces, Kierkegaard lends a thoughtful and intellectual tone without losing approachability.

Kierkegaard’s anatomy reflects a dialogue between philosophy and form. The slightly curved stems interpret the motion of natural handwriting, suggesting the trace of a broad nib. This approach creates a dynamic rhythm across lines of text, offering an elegant reading experience. The complete family contains 20 members in five weights, each paired with a matching italic. Additional features include old-style figures, small capitals, and refined character detailing for professional typographic versatility.
